National Specification for R&D Call 1

Swiss Federal Office for the Environment

The Federal Office for the Environment (FOEN) is the Swiss federal government's authority responsible for environmental protection and sustainable resource use. The FOEN has some financial resources that can be used to fund environmental research and technology development, and to support important third-party research studies and projects. The section Innovation within the division of Economics and Environmental observation administrates the FOEN's research contracts and contributions and support the development of environmental technologies in Switzerland by allocating federal contributions.
